Mock Interview Script – Snovasys (3 Rounds)

Instructions:

- The interview will consist of 3 rounds – 2 Technical and 1 HR.
- Practice concise answers (<90 seconds each for conceptual questions).
- For coding, explain logic first, then write clean code.

Round 1: Technical (Resume & Basics)

1. Walk me through your SnapStyle project.
2. How does the Bootstrap grid system work?
3. Difference between inline, internal, and external CSS?
4. What is Git? Explain how you used it in your project.
5. What are semantic HTML tags and why are they important?

Round 2: Technical (Problem-Solving & Applied Skills)

1. Write a program to reverse a string.
2. Check if a string is a palindrome.
3. Explain difference between == and === in JavaScript.
4. How do media queries help in responsive design?
5. Solve: Find the largest element in an array.
6. Explain your approach to debugging an issue in your frontend project.

Round 3: HR (Communication & Company Fit)

1. Tell me about yourself.
2. Why do you want to join Snovasys?
3. What are your strengths and weaknesses?
4. Are you open to a Support Trainee role if offered?
5. Where do you see yourself in 2 years?
6. Describe a time you overcame a challenge while learning a new skill.
